EDUCATION

Motilal Nehru National Institute of Technology 2018-2022
Bachelor of Technology in Electronics and Communication Engineering Prayagraj, Uttar Pradesh
 CGPA: 8.33

EXPERIENCE

Software Developer | Standard Chartered GBS Jul 2022- Present
- Spearheaded collaborative efforts with front-end development teams to craft advanced credit card applications, emphasizing user-centric design principles for optimal UI/UX experiences. Actively contributed ideas and solutions to enhance the overall user experience using React and Material-UI (Mui) components.
- Led initiatives within the Robotic Process Automation (RPA) team, achieving a notable **50%** increase in process efficiency and time savings through successful automation of manual processes.
- Conducted comprehensive code reviews, delivering targeted feedback that led to a **30%** reduction in post-release bugs and a significant improvement in overall code quality.

Frontend Development Internship | SpeedLabs Jul 2021
- Designed mail templates to enhance customer engagement, applying UI/UX principles for improved visual appeal and interaction.
- Worked closely with the UI/UX team, gaining insights into the design process and contributing to a user-centered approach.
- Participated in frontend development tasks, creating responsive and user-friendly web interfaces to enhance the overall user experience.

SKILLS

Programming	C++,C# .NET, Dart
Development	HTML, CSS, JavaScript, Bootstrap, React.js, Flutter
Design	Figma,Webflow, Sketch
Tools	Git, GitHub, MySQL, VSCode, Jira

PROJECTS

Credit Card Application | React, Redux, Javascript, HTML, CSS

- Implemented simplified Credit Card Onboarding Process for the India Market using NGOS and developed a user-friendly applicant form using React.js, leveraging the Material-UI (MUI) library for efficient UI components and styling.
- Orchestrated the front-end workflow to dynamically validate applicant information, including PAN availability checks, ensuring completeness and accuracy before submission.
- Integrated Axios for seamless API communication, enabling efficient data retrieval and interaction with backend services.

Samigo - Service Utility App | Flutter (Dart), Google Firebase, OpenStreetMaps

- Spearheaded the development of Samigo, a comprehensive service utility app using Flutter as the primary framework, facilitating seamless connections between users and service providers.
- Implemented advanced functionalities including user authentication, real-time location mapping, and secure payment gateways, ensuring a smooth and reliable user experience.
- Fostered a user-centric design approach, prioritizing usability and accessibility to enhance user engagement and satisfaction, resulting in streamlined service discovery and delivery processes.

ACHIEVEMENTS AND POSITION OF RESPONSIBILITIES

- Bagged first prize in Dance Competition in MNNIT Dance Club Event
- Member, Dramatics Club, MNNIT Actively participated in various theatrical productions and performances, honing skills in acting, stage management, and teamwork.
- First Position, Table Tennis, JOSH Sports Event, MNNIT
